

Fresh Flowers

Fresh flowers are one of my favourite accessories to include in a photoshoot. They're just a lovely natural way to introduce a splash of color or a hint of romance.

If you'd like to include flowers in your session, these will be provided for your use at absolutely no extra charge. Just let me know in advance any particular likes or dislikes with regards to colour and/or type of flower – or leave it up to me to choose something that will complement the colours and themes that we've planned to use.
